UNDER 5s DROP IN

Fridays: 10:30 to 1pm - £1 per session

Please bring fruit and vegetables to share at snack time.

The Dragon Hall under 5s Drop in is still running on Fridays from 10:30am to 1pm. This had been funded by LB Camden for nearly a decade but the funding came to an end in March 2016. It is a well loved drop in and we are going to keep it going as long as we can.

We are also fundraising to make sure that we can keep the wonderful Teresa as Drop In co-ordinator.

If you have any ideas of how we can raise funds please contact us or talk to Teresa.

We are always looking for volunteers to help set up the session, assist Teresa and support all of the children, parents and carers.

AFTER SCHOOL CLUB - AGE 8 -11

Monday, Tuesday & Friday. 3:30 to 6pm

Staff pick up children from the local primary schools

The After School Club has been running for nearly 10 years and despite the recent years of funding cuts is going strong and is still FREE!

The activities include a variety of sports, games, cookery, technology, homework support, indoor games, arts and crafts, cinema club, radio production, music sessions, micro bit sessions, camera workshop and loads more!

Why not come and give it a try? Drop into Dragon Hall or email us on info@dragonhall.org.uk, call 020 7404 7274, check the website www.dragonhall.org.uk

After School Club for 8 to 11 year olds every Monday, Tuesday & Friday Free. Pick up from St Josephs and Clement Danes Primary Schools

CODE CLUB @ DRAGON HALL

Code Club - Tuesdays 5pm to 6pm

(during term time) For children 8 to 11

An enthusiastic volunteer teams up with a community venue to run an after school club for children aged 9–11 using specially created Code Club resources.

The first Samsung Code Club Hub in London opened at Dragon Hall in February 2014.

Learning to code is an important skill now we are living in a digital age. It's not just enough for our children to know how to use technology – they need to know how it works too.

Learning to code doesn't just mean you can become a developer, it strengthens problem solving skills and logical thinking and supports key academic subjects such as science, maths and technology.

Code Club teaches children to program by showing them how to make computer games, animations and websites. Code Club is about fun, creativity and learning through exploring. They are in charge of the computer, and can (and should) make it do what they want, not the other way around.

AUDIO VIDEO STUDIO @ DRAGON HALL

New Mezzanine Studio @ Dragon Hall - the home of a brand new Audio Video Suite!

With a huge amount of hard work and determination to make this project come to life we now have a brand new audio video suite at Dragon Hall - well nearly. We have the infrastructure, the recording and control room, sound proofing, air con and all of the cables in place including patch panels for audio, video and lighting in the main hall itself.

We now just need to beg, borrow and fundraise to get the equipment to put into it! We also want to install a VERY LARGE green screen so that we can do CGI work. In addition to giving our Radio and Music projects a functional home The Mezz Studio will help us generate income so that we can support disadvantaged young people to create, gain tech skills & training to give them opportunities in the future.

The Mezz Studio @ Dragon Hall Can you help us get the equipment to make it fully functional?

**Volunteers always needed! Email info@dragonhall.org.uk
020 7404 7274 - @dragonhall**

TECH SATURDAYS @ DRAGON HALL

CoderDojo - Monthly Saturdays at Dragon Hall - check the website for dates!

CoderDojo is a worldwide movement of free, volunteer-led, community-based programming clubs for young people. Anyone aged seven to seventeen can visit a Dojo where they can learn to code, build a website, create an app or a game, and explore technology in an informal, creative, and social environment.

The CoderDojo movement believes that an understanding of programming languages is increasingly important in the modern world, that it's both better and easier to learn these skills early, and that nobody should be denied the opportunity to do so.

CoderDojo @ Dragon Hall on a Saturday - check the website for dates!

Raspberry Jam - bi-monthly Saturdays at Dragon Hall - check the website for dates!

Raspberry Jams are events organised by the community for people to share knowledge, learn new things, and meet other Pi enthusiasts. They're a great way to find out more about the Raspberry Pi and what you can do with it, and to find like-minded people.

Raspberry Jam @ Dragon Hall on Saturday - check the website!

Discovery Tech sessions on Saturdays at Dragon Hall - check the website for dates!

Here at Dragon Hall we have some amazing cutting edge technology and we give everyone a chance to try them out on Saturdays during the year. You can see 3D Printers, virtual reality headsets, augmented reality gadgets, play with circuits and robotics, discover wearable tech and vintage tech - the possibilities are endless and we have loads of different things each session!

Tech Discovery @ Dragon Hall on Saturday - check the website for dates!

Ninjas and volunteer Pi enthusiasts always needed to help out!
Next CoderDojo on 1st October, 2pm to 5pm @dragonhall

INTERS CLUB @ DRAGON HALL

Fridays from 4pm to 6:30pm, FREE, age 12 to 16

Music & Radio production is a speciality at Dragon Hall with partners including RadioActive101 - see www.dragonhall.org.uk/music-video and uk2.radioactive101.eu/broadcast

Dragon Hall's flagship RadioActive101 in collaboration with the University of East London producing **R a d i o** content for broadcasts involving young people from Dragon Hall, Soho Parish Primary School, The Squad in Merton, St Josephs Primary School and St Clement Danes Primary School in Covent Garden - the children and young people have learnt about presenting, editing, interviewing and general broadcast skills.

Every Thursday staff travel to Wimbledon to support a learning disability youth club called The Squad. Working with young people aged 16 to 25, The Squad provides some of the most vulnerable people in society with a youth club where they can meet their friends and try new things.

Age 12 to 16? Drop in on Fridays from 4pm to 6pm

The Intermediate group is a drop in available for young people aged 12 to 16. The club runs on Fridays from 4pm to 6pm. This was set up to support the transition period that all young people face after moving into secondary school, it is designed by young people giving them all the tools to take control of their own setting.

In collaboration with all the new exciting technology we do, we still run the traditional youth club that gives young people the chance to further their relationships with their peers. Open access and general activities like arts and crafts, cooking, sports and offsite trips are still regularly seen in our programmes.

The club is set up in the Green Room with numbers reaching 25 to 30 young people per session.

The club has a great atmosphere, helping young people to achieve their full potential in all the activities we have to offer.

**Age 12 upwards? Join the Inters Club @DragonHall. FREE

Youth Work & Tech @ Dragon Hall

Dragon Hall was chosen as one of only eight organisations across the UK to be a case study for a report 'Local Youth Groups Today' commissioned by UK Youth, the UK's largest national body for the youth sector. Dragon Hall was identified as 'an exemplar of innovation and best practice across the UK, providing direction and guidance for all local youth groups, membership bodies and representative organisations, to ensure that local youth provisions remain young people centred, deliver effectively and achieve sustainability.'

Following on from the last few years of technology sessions Dragon Hall is developing a new tech strategy and will be launching **20:20 Digital Vision** - our new technology project. The UK has the G20s largest Internet economy, the 3rd largest tech-cluster and needs 745,000 digitally skilled workers by 2017 but many young people, especially those who are disadvantaged and socially excluded already, are also excluded from the digital, creative and technology spaces.

Young people who are disabled, BAME, young women, learning disabled, NEET etc need a project that secures digital inclusion, develops advanced digital skills, builds personal capabilities and 21st Century competences and starts addressing digital skills and diversity gaps.

20:20 Digital Vision is a dynamic & world-class response to these issues. It involves primary partners Dragon Hall, vInspired, CIME & Wipers Youth alongside a network of researchers, technologists & youth workers (LonDIN), who will take participants through a 6-stage Digital Theory of Change. So, watch this space...
